Warsaw, Poland

PROFESSIONAL PROFILE

Experienced frontend engineer specializing in React, TypeScript, Next.js, GraphQL, and accessible product experiences. Strong background in human-computer interaction, design-system collaboration, performance tuning, and mentoring frontend teams across international product environments.

PROFESSIONAL EXPERIENCE

Senior React Engineer

Mar 2022 - Present

Vistula Commerce Labs · Warsaw, Poland

Team leadership: managed 4 people

- Led accessibility improvements across a customer-facing Next.js commerce product, raising WCAG alignment through semantic components, keyboard navigation, and screen-reader refinements.
- Managed a team of 4 frontend engineers, coordinating delivery planning, code reviews, mentoring, and frontend architecture decisions.
- Built TypeScript-based React features backed by GraphQL APIs, improving checkout usability and reducing frontend defects.
- Partnered with product designers to evolve a reusable component library with accessible patterns and documented usage guidelines.

Technologies: React, TypeScript, Next.js, GraphQL, Apollo Client, Storybook, Jest, Playwright, CSS Modules, Accessibility

Frontend Engineer

Jan 2019 - Feb 2022

Northline Digital Works · Krakow, Poland

- Delivered React and TypeScript dashboards for logistics customers, integrating GraphQL queries with reusable data visualization components.
- Improved application performance through code splitting, memoization, bundle analysis, and server-side rendering practices in Next.js.
- Introduced accessibility checks into pull requests and collaborated with QA to validate keyboard flows, focus states, and ARIA usage.

Technologies: React, TypeScript, Next.js, GraphQL, Redux Toolkit, Cypress, Sass, Webpack, Accessibility

Junior Frontend Developer

Jul 2017 - Dec 2018

PixelHarbor Studio · Warsaw, Poland

- Implemented responsive interfaces for subscription and media clients using React, JavaScript, and component-based CSS.
- Converted UX prototypes into production features while applying usability principles from human-computer interaction research.
- Created unit and integration tests for interactive UI components and supported browser compatibility improvements.

Technologies: React, JavaScript, HTML5, CSS3, Jest, Git, Figma
