Madrid, Spain

PROFESSIONAL PROFILE

Data Engineer with 6 years of experience building reliable batch and streaming data platforms. Strong hands-on background with Python, Spark, SQL, Kafka, and Azure, including Spark pipelines that process streaming Kafka data for analytics and operational reporting. Native Spanish speaker and fluent in English, comfortable working across international product and data teams.

PROFESSIONAL EXPERIENCE

Data Engineer

Aug 2023 - Present

Nubera Analytics · Madrid, Spain

- Built and maintained Spark Structured Streaming pipelines consuming Kafka topics and delivering curated datasets to Azure Data Lake Storage.
- Developed Python and SQL transformations that reduced daily data reconciliation effort for finance and operations teams.
- Implemented monitoring and schema validation for streaming jobs, improving incident detection and data quality.
- Collaborated with analysts and platform engineers in Spanish and English to define data contracts and delivery SLAs.

Technologies: Python, Spark, Spark Structured Streaming, SQL, Kafka, Azure, Azure Data Lake Storage, Databricks

Associate Data Engineer

Feb 2021 - Jul 2023

Asteria Mobility Systems · Madrid, Spain

- Designed ETL pipelines for vehicle telemetry and customer usage data using Python, Spark, and SQL.
- Integrated Kafka event streams into batch and near-real-time reporting models hosted on Azure.
- Optimized Spark jobs by tuning partitions and joins, cutting several pipeline runtimes for high-volume datasets.
- Created reusable data ingestion templates and documentation for analytics stakeholders.

Technologies: Python, Spark, SQL, Kafka, Azure Synapse Analytics, Azure Blob Storage, Airflow

Junior Data Engineer

Aug 2019 - Jan 2021

Cielo Verde Digital · Madrid, Spain

- Built SQL data marts and Python ingestion scripts for marketing and e-commerce reporting.
- Assisted with migration of scheduled data workflows from on-premise servers to Azure-based storage and compute services.
- Wrote validation queries and automated checks that improved reliability of weekly executive dashboards.

Technologies: Python, SQL, Azure, Azure SQL Database, Pandas, Git
