Berlin, Germany

PROFESSIONAL PROFILE

Mid-level Python backend engineer based in Berlin with production experience building Django services, integrating Redis-backed caching and queues, and working with PostgreSQL in cloud-hosted environments. Comfortable shipping containerized APIs with Docker, collaborating in agile teams, and writing maintainable backend code for business-critical systems. Native German speaker and fluent in English.

PROFESSIONAL EXPERIENCE

Python Backend Engineer

Apr 2023 - Present

Nordfluss Digital · Berlin, Germany

- Designs and maintains Django-based API services for internal operations and customer workflows.
- Uses Redis for caching, background jobs, and rate-limiting to improve responsiveness.
- Works with PostgreSQL schema changes, query optimization, and data integrity checks.
- Containerizes services with Docker and supports deployment automation in the release pipeline.

Technologies: Python, Django, PostgreSQL, Redis, Docker

Backend Developer

Aug 2020 - Mar 2023

Mitte Commerce Labs · Berlin, Germany

- Built and extended Python services for order processing and account management.
- Implemented Django endpoints and data models connected to PostgreSQL.
- Introduced Redis caching for frequently accessed data and asynchronous task handling.
- Improved API reliability through code reviews, testing, and production issue triage.

Technologies: Python, Django, PostgreSQL, Redis, Docker

Junior Software Developer

Jan 2019 - Jul 2020

Alpen Byte Studio · Potsdam, Germany

- Developed backend features in Python under senior engineer guidance.
- Supported REST API work, database migrations, and bug fixes across release cycles.
- Used Docker for local development environments and reproducible builds.
- Documented endpoints and collaborated with frontend and QA colleagues.

Technologies: Python, Django, PostgreSQL, Docker

SKILLS

PROGRAMMING LANGUAGES

Python 6.5y

FRAMEWORKS

Django 5.5y

DATABASES

PostgreSQL 5.5y

Redis 4.5y

DEVOPS & DELIVERY

Docker 5y
