Milan, Italy

PROFESSIONAL PROFILE

.NET Backend Engineer with 6 years of backend experience building C# services, REST APIs, and integration components for business platforms. Strong background with .NET, SQL Server data modeling, Azure deployments, and Docker-based delivery workflows, with a focus on reliable, maintainable backend systems.

PROFESSIONAL EXPERIENCE

.NET Backend Engineer

Sep 2023 - Present

NebulaPay Software · Milan, Italy

- Developed C# and .NET 8 backend services for payment operations, exposing REST APIs consumed by web and partner systems.
- Built data access layers and stored procedures on SQL Server, improving reconciliation query performance by 32%.
- Packaged services with Docker and deployed containerized workloads to Azure using Azure Container Registry and Azure App Service.
- Improved observability with structured logging, health checks, and deployment dashboards in Azure DevOps pipelines.

Technologies: C#, .NET 8, ASP.NET Core, Entity Framework Core, SQL Server, Azure, Azure App Service, Azure Container Registry, Docker, Azure DevOps

Backend Developer

Jul 2020 - Aug 2023

Alba Retail Systems · Milan, Italy

- Implemented .NET Core APIs for inventory, order processing, and supplier integrations across a multi-tenant retail platform.
- Designed SQL Server schemas, indexes, and migration scripts to support reporting and operational workflows.
- Introduced Docker-based local development environments, reducing onboarding time for backend contributors.
- Created integration tests and CI checks for API contracts, improving release confidence for monthly deployments.

Technologies: C#, .NET Core, ASP.NET Core Web API, SQL Server, Entity Framework Core, Docker, Git, REST APIs, xUnit
