Vienna, Austria

PROFESSIONAL PROFILE

Cloud Data Engineer focused on reliable analytics platforms, orchestration, and infrastructure automation. Experienced with Python-based data pipelines, Apache Airflow scheduling, Snowflake data warehousing, Terraform-managed cloud resources, and GCP services for scalable batch and ELT workloads.

PROFESSIONAL EXPERIENCE

Cloud Data Engineer

Apr 2023 - Present

AlpenStream Analytics · Vienna, Austria

- Designed and maintained Apache Airflow DAGs for finance and operations data pipelines, improving pipeline observability and recovery handling.
- Automated Snowflake warehouse, role, database, and schema provisioning with Terraform modules and version-controlled deployment workflows.
- Built Python ELT components running on GCP Cloud Run and Cloud Storage to standardize ingestion from partner APIs and internal event exports.
- Collaborated with analytics engineers to optimize Snowflake models, reducing recurring transformation runtimes for high-volume reporting datasets.

Technologies: Python, Apache Airflow, Snowflake, Terraform, GCP, Cloud Run, Cloud Storage, SQL, GitHub Actions

Data Engineer

Oct 2020 - Mar 2023

VelaGrid Systems · Vienna, Austria

- Developed Python ingestion services for customer, billing, and product telemetry data using scheduled Airflow workflows.
- Implemented Snowflake data marts and secure data sharing patterns for reporting teams across product and finance domains.
- Created Terraform templates for repeatable GCP project setup, IAM bindings, service accounts, and storage resources.
- Improved data quality checks and alerting around daily batch loads, reducing manual investigation effort for failed deliveries.

Technologies: Python, Apache Airflow, Snowflake, Terraform, GCP, BigQuery, SQL, Docker

Junior Data Engineer

Sep 2018 - Sep 2020

Nordlicht Digital Works · Graz, Austria

- Supported ETL pipeline development in Python and SQL for marketing analytics and operational dashboards.
- Migrated legacy file-based reporting workflows into cloud storage and scheduled transformations with Airflow.
- Documented data lineage and validation rules to help analysts understand source-to-report dependencies.

Technologies: Python, SQL, Apache Airflow, PostgreSQL, Cloud Storage, Linux

SKILLS

PROGRAMMING LANGUAGES

Python 5.5y SQL 5.5y

DATA & AI

Apache Airflow 5y Data Modeling 4y

DATABASES

Snowflake 3.5y BigQuery 2.5y

DEVOPS & DELIVERY

Terraform 3y Docker 2.5y GitHub Actions 2y

CLOUD

GCP 3.5y Cloud Run 2y Cloud Storage 4y

EDUCATION

MSc in Data Engineering

Danube Institute of Technology
2016 - 2018 · Krems, Austria

BSc in Information Systems

Vienna Applied Computing Academy
2013 - 2016 · Vienna, Austria

CERTIFICATIONS

Cloud Data Platform Specialist

Analytics Engineering Council · 2023
