Lisbon, Portugal

PROFESSIONAL PROFILE

DevOps and Cloud Engineer with 7 years of cloud operations experience, focused on AWS infrastructure, Terraform automation, Kubernetes platforms, Docker-based delivery, and reliable Linux environments. Experienced in improving deployment repeatability, observability, and operational stability for SaaS and data-intensive systems.

PROFESSIONAL EXPERIENCE

DevOps and Cloud Engineer

Mar 2023 - Present

Lusora Cloud Systems · Lisbon, Portugal

- Automated AWS infrastructure provisioning with Terraform modules for networking, IAM, compute, and managed database services.
- Operated Kubernetes clusters for customer-facing services, improving rollout consistency with standardized Helm deployment patterns.
- Built Docker image pipelines with vulnerability scanning and promotion gates for staging and production environments.
- Maintained Linux-based observability and incident response runbooks, reducing recurring operational alerts.

Technologies: AWS, Terraform, Kubernetes, Docker, Linux, Helm, GitHub Actions, Prometheus, Grafana

Cloud Operations Engineer

Feb 2020 - Feb 2023

Maralto Digital Platforms · Porto, Portugal

- Managed AWS environments across development, staging, and production, supporting compute, storage, load balancing, and backup operations.
- Introduced Terraform workflows that replaced manual infrastructure changes and improved auditability of cloud resources.
- Containerized internal services with Docker and supported Kubernetes migration for selected backend workloads.
- Created Linux automation scripts for patching, log rotation, and service health checks.

Technologies: AWS, Terraform, Docker, Kubernetes, Linux, Bash, CloudWatch, Nginx

Junior Systems and DevOps Engineer

Jan 2019 - Jan 2020

TejoSoft Solutions · Lisbon, Portugal

- Supported Linux server administration for web applications, including access control, package updates, and service troubleshooting.
- Assisted with Docker-based local development environments to align developer workstations with deployment targets.
- Maintained CI jobs for build validation and deployment packaging under guidance from senior engineers.

Technologies: Linux, Docker, Bash, GitLab CI, PostgreSQL
