PROFESSIONAL PROFILE

Senior Platform Engineer with 10 years of experience designing Azure cloud platforms, Kubernetes environments, and automated delivery workflows. Strong background in building Azure infrastructure with Terraform, creating deployment automation with GitHub Actions, and using Python to improve operational reliability.

PROFESSIONAL EXPERIENCE

Senior Platform Engineer

Sep 2022 - Present

Cloudbridge Systems · Prague, Czechia

- Designed reusable Terraform modules for Azure networking, compute, identity, and monitoring services across multiple product teams.
- Operated shared Kubernetes platform services, improving release consistency and reducing manual cluster maintenance.
- Created GitHub Actions deployment workflows with environment approvals, reusable pipelines, and automated rollback steps.
- Developed Python utilities for infrastructure validation, cost reporting, and platform health checks.

Technologies: Azure, Terraform, Kubernetes, GitHub Actions, Python, Helm, Azure Monitor

Platform Engineer

Jan 2019 - Aug 2022

Novastra Digital · Brno, Czechia

- Built Azure infrastructure foundations with Terraform for customer-facing applications and internal developer platforms.
- Migrated container workloads to Kubernetes and standardized Helm-based application releases.
- Implemented CI/CD pipelines in GitHub Actions for build, test, security scanning, and deployment automation.
- Partnered with software teams to improve observability, incident response, and cloud resource governance.

Technologies: Azure, Terraform, Kubernetes, GitHub Actions, Python, Docker, Prometheus, Grafana

DevOps Engineer

Jul 2016 - Dec 2018

Railpoint Software · Prague, Czechia

- Automated Linux server provisioning and application deployments using infrastructure-as-code practices.
- Wrote Python scripts to streamline release preparation, log analysis, and environment checks.
- Supported early container adoption and helped teams package services consistently with Docker.
- Maintained CI workflows and improved deployment documentation for distributed engineering teams.

Technologies: Python, Docker, Linux, Bash, Jenkins, Ansible, Git
