Dublin, Ireland

PROFESSIONAL PROFILE

Full-Stack JavaScript Engineer with 6 years of experience building TypeScript applications across Node.js, NestJS, React, and MongoDB. Skilled at delivering production APIs, responsive interfaces, and maintainable full-stack features for SaaS and customer-facing platforms.

PROFESSIONAL EXPERIENCE

Full-Stack JavaScript Engineer

Aug 2023 - Present

Liffey Digital Systems · Dublin, Ireland

- Built and maintained NestJS APIs for subscription management, user permissions, and audit logging used by business customers.
- Delivered React and TypeScript interfaces with reusable components, form validation, and accessible dashboard workflows.
- Optimized MongoDB queries and indexes for production collections, reducing slow report loads and improving API response consistency.
- Collaborated with product and QA to ship full-stack features through code reviews, automated checks, and staged releases.

Technologies: Node.js, NestJS, React, TypeScript, MongoDB, REST APIs, Jest, Docker

JavaScript Software Engineer

May 2021 - Jul 2023

Harbourline Software · Dublin, Ireland

- Developed customer onboarding journeys using React, TypeScript, and Node.js services integrated with internal identity systems.
- Created NestJS service modules for notifications, profile updates, and account settings with structured validation and logging.
- Used MongoDB in production applications for document storage, reporting views, and operational support tooling.
- Improved frontend performance by splitting bundles, refining state management patterns, and simplifying API data fetching.

Technologies: Node.js, NestJS, React, TypeScript, MongoDB, Redux, Express, Cypress

Junior Full-Stack Developer

Aug 2019 - Apr 2021

Cedar Quay Labs · Dublin, Ireland

- Implemented full-stack features for an operations portal using React components and Node.js REST endpoints.
- Added TypeScript gradually across shared frontend utilities and backend request models to improve maintainability.
- Built MongoDB-backed admin screens for searching customer records, updating metadata, and exporting operational reports.

Technologies: Node.js, React, TypeScript, MongoDB, Express, HTML, CSS, Git
