Toulouse, France

PROFESSIONAL PROFILE

Machine Learning Engineer with 6 years of experience building, evaluating, and deploying production ML systems. Specializes in Python and TensorFlow workflows, tracks experiments with MLflow, and deploys containerized models to Kubernetes on GCP for scalable inference.

PROFESSIONAL EXPERIENCE

Machine Learning Engineer

Jan 2024 - Present

Auralis Mobility Labs · Toulouse, France

- Built TensorFlow models for route-demand forecasting and anomaly detection using Python feature pipelines.
- Standardized experiment tracking with MLflow, improving reproducibility across model training and evaluation runs.
- Deployed batch and real-time inference services as Docker containers on Kubernetes using GCP services including GKE, Cloud Storage, and Pub/Sub.
- Partnered with data engineers to monitor model drift, latency, and prediction quality in production.

Technologies: Python, TensorFlow, MLflow, Kubernetes, GCP, GKE, Docker, Cloud Storage, Pub/Sub, Pandas

Junior Machine Learning Engineer

Aug 2020 - Dec 2023

Nuvio Analytics · Montpellier, France

- Developed supervised learning models in Python for customer segmentation, churn prediction, and operational forecasting.
- Implemented TensorFlow training pipelines and reusable preprocessing components for structured and time-series datasets.
- Introduced MLflow run logging for hyperparameters, metrics, artifacts, and model registry handoffs.
- Packaged trained models for API-based serving and collaborated on cloud deployment practices.

Technologies: Python, TensorFlow, MLflow, Scikit-learn, SQL, Docker, FastAPI, Pandas, NumPy
