Cork, Ireland

PROFESSIONAL PROFILE

Junior QA Automation Engineer with 2 years of quality engineering experience building automated UI and API test coverage for web applications. Skilled in Python, Playwright, Pytest, API Testing, and CI/CD workflows, with hands-on experience creating regression suites, improving test reliability, and supporting release validation.

PROFESSIONAL EXPERIENCE

Junior QA Automation Engineer

Feb 2025 - Jul 2026

Harbourline Software · Cork, Ireland

- Built and maintained Playwright end-to-end test suites for customer onboarding and account management journeys.
- Developed Pytest-based API tests covering authentication, validation errors, and core service workflows.
- Integrated automated test runs into CI/CD pipelines to provide faster feedback on pull requests and release candidates.
- Documented reproducible defects and collaborated with developers to improve regression coverage and test stability.

Technologies: Python, Playwright, Pytest, API Testing, GitHub Actions, REST APIs, CI/CD

QA Automation Intern

Aug 2024 - Jan 2025

Riverbyte Digital · Cork, Ireland

- Assisted in converting manual smoke checks into automated Playwright tests for a browser-based operations portal.
- Created Python helper scripts to generate test data and reduce repetitive setup work for QA cycles.
- Executed API Testing scenarios with Pytest and captured clear evidence for defects found during sprint validation.

Technologies: Python, Playwright, Pytest, Postman, REST APIs, Git, CI/CD

SELECTED PROJECTS

API Regression Toolkit 2025

Created a reusable regression toolkit for validating REST API endpoints, combining Pytest test cases with Playwright-supported setup flows and structured reporting for repeatable release checks.

Technologies: Python, Pytest, Playwright
