+46 31 555 0147

Gothenburg, Sweden

PROFESSIONAL PROFILE

Python Full-Stack Engineer with 6 years of experience building Django APIs, Vue.js interfaces, and PostgreSQL-backed web platforms. Strong in containerizing services with Docker, improving delivery workflows, and collaborating with product and design teams in agile environments.

PROFESSIONAL EXPERIENCE

Python Full-Stack Engineer

Mar 2024 - Present

Nordhaven Digital Labs · Gothenburg, Sweden

- Developed Django REST APIs for customer onboarding, account workflows, and internal administration tools.
- Built Vue.js components for responsive dashboards used by operations and support teams.
- Containerized application services with Docker and streamlined local developer setup across backend and frontend teams.

Technologies: Python, Django, Django REST Framework, Vue.js, PostgreSQL, Docker, Redis, GitLab CI

Full-Stack Developer

Jan 2022 - Feb 2024

SkalaSoft Systems · Gothenburg, Sweden

- Delivered Python and Django features for subscription management, billing views, and role-based user access.
- Created Vue.js interfaces connected to PostgreSQL-backed APIs with attention to accessibility and performance.
- Optimized database queries and background jobs, reducing response times for high-volume account pages.

Technologies: Python, Django, Vue.js, PostgreSQL, Docker, Celery, RabbitMQ

Junior Web Developer

Aug 2020 - Dec 2021

Fjordbyte Applications · Gothenburg, Sweden

- Implemented backend endpoints in Python and Django for content publishing and reporting workflows.
- Maintained Vue.js pages and reusable UI modules for small-business web applications.
- Packaged development environments with Docker to improve consistency between laptops and shared staging servers.

Technologies: Python, Django, Vue.js, PostgreSQL, Docker, HTML, CSS
