PROFESSIONAL PROFILE

Junior Full-Stack Engineer with 2 years of experience building web applications with Python, FastAPI, React, TypeScript, and PostgreSQL. Comfortable developing REST APIs, reusable UI components, database-backed features, and participating in code reviews within agile product teams.

PROFESSIONAL EXPERIENCE

Junior Full-Stack Engineer

Jul 2025 - Jul 2026

BrightLedger Systems · Sofia, Bulgaria

- Developed FastAPI endpoints in Python for customer onboarding workflows, including validation, pagination, and structured error handling.
- Built React and TypeScript components for internal dashboards, improving form usability and reducing repeated UI code.
- Implemented PostgreSQL queries and schema updates for account, activity, and reporting features.
- Collaborated with QA and product colleagues in sprint planning, code reviews, and release verification.

Technologies: Python, FastAPI, React, TypeScript, PostgreSQL, Git, Docker

Full-Stack Developer Intern

Jul 2024 - Jun 2025

Novara Cloudworks · Sofia, Bulgaria

- Built a React interface backed by FastAPI and PostgreSQL for tracking applicant profiles, notes, and status changes.
- Created TypeScript form components with client-side validation and reusable table views for operations users.
- Wrote Python service logic and database migrations to support search, filtering, and audit history features.
- Contributed unit tests and API documentation for handover to the engineering team.

Technologies: Python, FastAPI, React, TypeScript, PostgreSQL, SQLAlchemy, Pytest
