Krakow, Poland

PROFESSIONAL PROFILE

Junior Analytics Engineer with 2 years of experience building SQL-first data models, dbt transformations, and BigQuery datasets for reporting and operational analytics. Comfortable using Python and Docker to automate data checks, support reproducible development, and improve warehouse reliability.

PROFESSIONAL EXPERIENCE

Junior Analytics Engineer

Jan 2025 - Jun 2026

Vistula Metrics Labs · Krakow, Poland

- Built and maintained dbt models in BigQuery for finance and customer-success reporting marts.
- Wrote SQL transformations, incremental models, and documentation to improve trust in core warehouse tables.
- Developed Python checks for freshness, null rates, and duplicate detection, then ran them in Docker for consistent local execution.
- Partnered with analysts to troubleshoot data discrepancies and deliver governed datasets for dashboarding.

Technologies: SQL, dbt, BigQuery, Python, Docker

Data Analyst Intern

Jul 2024 - Dec 2024

Northgate Commerce Systems · Krakow, Poland

- Prepared SQL queries and reusable views for weekly sales, inventory, and campaign performance analysis.
- Assisted with migration of spreadsheet-based reporting logic into warehouse tables and dbt staging models.
- Created Python scripts to validate CSV extracts before loading them into analytics workflows.

Technologies: SQL, Python, dbt, BigQuery

SKILLS

PROGRAMMING LANGUAGES

Python 2y

SQL 2y

EDUCATION

Bachelor of Engineering in Computer Science and Econometrics

Krakow Institute of Applied Technology
2020 - 2024 · Krakow, Poland

SELECTED PROJECTS

Warehouse Quality Monitor 2026

Created a data-quality monitoring project that validates dbt-managed BigQuery tables for freshness, row-count anomalies, null thresholds, and duplicate keys, with Python scripts producing concise issue reports for analytics users.

Technologies: Python, dbt, BigQuery
