Copenhagen, Denmark

PROFESSIONAL PROFILE

Senior Technical Product Manager with 11 years of product experience across SaaS platforms, commerce, and data-driven customer experiences. Skilled in product strategy, roadmapping, analytics, SQL-based prioritization, and stakeholder management, with a track record of aligning engineering, design, commercial, and executive teams. Managed a cross-functional team of 9 people while leading platform initiatives from discovery through launch.

PROFESSIONAL EXPERIENCE

Senior Technical Product Manager

Jan 2023 - Present

Harborline Commerce · Copenhagen, Denmark

Team leadership: managed 9 people

- Owns product strategy and quarterly roadmapping for a B2B commerce platform serving Nordic retail partners.
- Uses SQL, funnel analytics, and cohort analysis to prioritize backlog items and validate product decisions with measurable impact.
- Managed a cross-functional team of 9 people across engineering, UX, data, and go-to-market functions.
- Led stakeholder management with executives, enterprise customers, and delivery teams to align platform investment with revenue goals.

Technologies: SQL, Looker, Amplitude, Jira, Confluence, REST APIs, Google BigQuery

Product Manager, Data Products

Mar 2020 - Dec 2022

Northbay Mobility Labs · Copenhagen, Denmark

- Defined roadmap for analytics products used by operations teams to monitor mobility availability and customer demand.
- Partnered with data engineers to translate SQL analysis and dashboard insights into prioritised product improvements.
- Introduced discovery rituals, opportunity scoring, and stakeholder review forums that improved roadmap transparency.
- Launched self-service reporting features that reduced recurring analyst requests for partner success teams.

Technologies: SQL, Tableau, Snowflake, Python notebooks, Jira, Segment

Technical Product Owner

Jul 2017 - Feb 2020

Fjordbyte Platforms · Aarhus, Denmark

- Owned roadmap execution for API and identity services used by subscription-based digital products.
- Worked with engineering leads to refine technical requirements, manage dependencies, and communicate trade-offs to stakeholders.
- Used product analytics and support data to prioritise authentication, onboarding, and reliability improvements.
- Coordinated release planning across backend, frontend, QA, and customer operations teams.

Technologies: REST APIs, OAuth 2.0, PostgreSQL, Google Analytics, Azure DevOps, Miro

Associate Product Manager

Sep 2015 - Jun 2017

LumaPay Systems · Copenhagen, Denmark

- Supported discovery, requirements definition, and roadmap updates for payment workflow tools used by small businesses.
- Analysed adoption metrics and customer feedback to identify onboarding improvements and reduce drop-off.
- Prepared stakeholder updates, sprint goals, and release notes for engineering and commercial teams.

Technologies: SQL, Mixpanel, Excel, Trello, Balsamiq
