Valencia, Spain

PROFESSIONAL PROFILE

Junior Python API Engineer with 2 years of backend experience building REST APIs, data models, and automated tests. Experienced in Flask, SQLAlchemy, Pytest, and Git, with a focus on clean API design, reliable database integration, and maintainable code.

PROFESSIONAL EXPERIENCE

Junior Backend Developer

Jan 2025 - Present

Arco Labs · Valencia, Spain

- Develop REST endpoints for internal and customer-facing services using Flask.
- Model application data with SQLAlchemy and write database queries for PostgreSQL-backed features.
- Create automated test coverage with Pytest for API behavior and edge cases.
- Use Git workflows for code reviews, branching, and release preparation.

Technologies: Python, Flask, SQLAlchemy, Pytest, Git, PostgreSQL

Backend Developer Intern

Jan 2024 - Dec 2024

Northbay Digital · Valencia, Spain

- Supported development of Python services and small API enhancements.
- Helped implement SQLAlchemy models and migration-ready schema changes.
- Built and maintained Pytest suites for endpoint validation and regression checks.
- Collaborated with senior engineers through Git pull requests and issue tracking.

Technologies: Python, Flask, SQLAlchemy, Pytest, Git

SELECTED PROJECTS

Community Events API 2025

Built a Flask API for managing community events, including endpoints for event listings, registrations, and organizer updates. Used SQLAlchemy for persistence and Pytest to verify key API flows and database interactions.

Technologies: Python, Flask, SQLAlchemy
