Lyon, France

PROFESSIONAL PROFILE

Experienced backend engineer specializing in Java and Spring Boot platforms for distributed commerce and logistics systems. Strong track record designing event-driven services with Kafka, building reliable PostgreSQL-backed APIs, and deploying containerized workloads to Kubernetes. Comfortable leading engineering teams, improving delivery practices, and partnering with product and infrastructure stakeholders.

PROFESSIONAL EXPERIENCE

Senior Java Backend Engineer

Mar 2022 - Present

Novalys Digital · Lyon, France

Team leadership: managed 7 people

- Led a team of 7 engineers delivering backend services for a high-volume order orchestration platform.
- Designed event-driven Spring Boot services using Kafka topics, schema evolution practices, and idempotent consumers.
- Deployed Spring Boot workloads to Kubernetes with health checks, autoscaling policies, and zero-downtime rollout procedures.
- Improved PostgreSQL query performance and transaction handling, reducing payment reconciliation latency.

Technologies: Java, Spring Boot, Kafka, PostgreSQL, Kubernetes, Docker, Helm, JUnit, REST APIs

Backend Engineer

Jul 2018 - Feb 2022

Arvencia Systems · Grenoble, France

- Built Java microservices for subscription billing, customer identity, and invoicing workflows.
- Implemented Kafka-based integration between billing services and downstream analytics pipelines.
- Designed PostgreSQL schemas, indexes, and migration scripts for multi-tenant data models.
- Introduced automated integration testing and CI checks that improved release confidence.

Technologies: Java, Spring Boot, Kafka, PostgreSQL, Flyway, GitLab CI, Docker, Mockito

Java Software Developer

Sep 2015 - Jun 2018

HelioForge Applications · Lyon, France

- Developed RESTful backend modules for transportation scheduling and fleet operations products.
- Migrated legacy service components to Spring Boot, improving maintainability and deployment consistency.
- Created database access layers and reporting queries on PostgreSQL for operational dashboards.

Technologies: Java, Spring Boot, PostgreSQL, REST APIs, Maven, JUnit, Linux

Junior Backend Developer

Oct 2013 - Aug 2015

Cerisane Labs · Lille, France

- Maintained Java web services and internal APIs for account management applications.
- Added unit tests, logging improvements, and SQL fixes to stabilize production support workflows.

Technologies: Java, Spring Framework, PostgreSQL, SQL, JUnit, Git
